

A "Free Press" - which now includes the air waves - is a vital part of a free country. When a large Broadcasting company attempts to influence the outcome of a crucial Presidential election by commandeering the air waves, this attacks the heart of democracy.

I hope you will investigate, and then halt, Sinclair Broadcasting's pre-emption of their regular broadcasts to show "Stolen Honor." I believe that their free use of the air waves - which should belong to all of us - to launch what is nothing less than a smear campaign of a Presidential candidate is an assault on our democratic way of life.

Thank you for affording an opportunity to share my strong views.
